Stated dimensions are measured to the exterior face of exterior walls, to the midpoint of demising walls and to the exterior face of walls adjoining corridors or other common elements. This method of measurement varies from the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes interior structural components).

Note that measurements of rooms set forth on the floor plan are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any cutouts. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times the width. All dimensions are approximate and may vary with actual construction, and all floor plans and development plans are subject to change. Ceiling heights referenced herein are measured from the top of the lower floor slab to the top of the upper floor slab and exclude those areas where any soffit, moldings, dropped and/or suspended ceilings and/or light fixtures may be installed. As such, the referenced ceiling heights may not represent actual ceiling clearances. The floor plan and square footage referenced herein are believed to be true and accurate, but are not guaranteed and may be revised, amended, or changed without notice. All dimensions are approximate, and are subject to change in accordance with a contract of sale. All information contained herein is believed to be accurate but is not warranted. All information provided is stated without warranties of any kind, either express or implied, including, but not limited to, warranties of title, implied warranties of merchantability or fitness for a specific purpose.
